SUPERIOR GLADS

LIBERTY CENTER

OHIO

Romacres Superior Glads

MADE GLAD FANS

at the Central International Glad Show held in Lansing, Michigan and at the Ohio Glad Show at Higbea's in Cleveland last August. Those of you who attended those shows will recognize the motif on our cover which identifies us with that display described by the Florist's Review as "spectacular."

This was the first year Romacres had ever exhibited at any show. It seemed the wholesale cut flower business always took a wild spurt at show time and "show" glads were delivered to CASH customers. Now we have more help, so look us up at the shows next summer.

With Romacres Superior Glad bulbs, "show" glads are just a matter of careful attention to planting guides and supplying plenty of water to the plants while they are forming spikes. We enclose the National Gladiolus Society Booklet on gladiolus culture with every order.

We hope to meet you at the shows and see the spikes which won the blue ribbons for you. The thrill of the glad show will be doubled if you are exhibiting and more than tripled when you are the winner of the coveted ribbons.

JOIN A GLADIOLUS SOCIETY

If you are a glad fan, by all means join one of the large gladiolus societies.

NORTH AMERICAN GLADIOLUS COUNCIL Alfons Bazdorf, Lincoln Park, New Jersey is the membership secretary. Membership is \$2.00 a year. Their publications keep you posted. A membership in the NEW ENGLAND GLADIOLUS SOCIETY --entitles you to THE GLADIOLUS MAGAZINE --which contains illustrated articles on planting, fertilizing, etc., show dates, harvesting, curing, storing, reports from many shows and other informational material.

Regular membership \$3.00 per year. Send dues check to NEW ENGLAND GLADIOLUS SOCIETY, INC., Horticultural Hall, Boston, Mass.

Better join both societies as well as your own state society.

Our Special Price collection of standard regular type varieties.

PLEASE READ CAREFULLY BEFORE ORDERING

ACKNOWLEDGEMENT OF ORDERS: As soon as your order is received, you will get a postal card acknowledging your order. Keep a copy of your order.

ORDERS FOR LESS THAN \$2.50 cost us as much expense in labor and trouble as those over. PLEASE DO NOT SEND ORDERS FOR LESS THAN \$2.50.

In orders of \$5 to \$10 you may add 10% of the total order in extra bulbs of your choice. Add 15% on orders from \$10 to \$20 and 20% on all orders above \$20 fully paid in advance.

PAYMENTS: Please send check, postal or express money orders or drafts. Do NOT send cash.

SHIPMENT: All retail orders are shipped parcel post to all points in the U.S.A. We begin shipping AS SOON AS WEATHER PERMITS.

BULB SIZES: Bulbs are graded in six different sizes from No. 1 to No. 6. The largest size is No. 1 which is $1\frac{1}{2}$ inches in diameter or over. No. 2 bulbs run from $1\frac{1}{4}$ inches to $1\frac{1}{2}$ inches with $\frac{1}{4}$ inch variation in each size down to No. 6, which is $\frac{1}{2}$ inch or under. These are all diameters. Do not be fooled by offers of bulbs sized by circumference. Gladiolus are usually sold by diameter. Retail lists are made up of Large, Medium and Small sizes. Large is No. 1 and No. 2 sizes; Medium No. 3 and No. 4; and Small No. 5 and No. 6 sizes. We always use the larger of the two sizes as long as they last. When they are gone, we send the second size. If your order calls for Medium and you get part No. 3 and part No. 4, please do not write us about it saying we sent the wrong size. It is simply that we were out of the larger size so we sent the next size which is still Medium.

Medium size bulbs will bloom, although the spike will not usually have as many buds as the large size bulbs. Small size will bloom if they have a long season in which to grow.

EXPLANATION: After each variety name in parenthesis () is the originator's name and date of introduction. Following that we list the number of days it takes that particular variety to bloom, and the last number is the classification number.

GUARANTEE: Above all, we take great pains to keep our stock absolutely true to name, but mistakes do happen in spite of all we can do. If bulbs are not satisfactory, we will do our best to make them so or will refund your money if returned to us promptly.

We can do no more.

Of course we CANNOT guarantee your crop. There are too many conditions over which we have no control --soil, weather, rain, etc.

SUBSTITUTION: We do not substitute varieties unless you give express permission. We do occasionally substitute the next size larger or smaller, when we are out of the size ordered, and give you value in bulbs to the amount you send. It helps us if you will give permission to substitute and we will always try to substitute in color if so permitted. Do not be afraid to give us permission to substitute - for our policy is always to give greater value in case of substitution.

PLANTING INSTRUCTIONS INCLUDED WITH ORDER.

RECENT INTRODUCTIONS 1950-1951

These are the new "show" glads welcomed by fancier and exhibitors.

ACE OF SPADES (454) (Sisson '50)

The blackest of the black reds, just a shade deeper than Black Cherry. Opens up to 5-6 ruffled florets of clear black-red, shading lighter in the throat. Good propagator of easily germinating bulblets. Tall, healthy grower; produces long flower heads.

BLUE DEVIL (479) (Larus '51) (75 days)

Clear, deep violet with a deep rose blotch on a prominent white throat. Tall, vigorous grower that does not crook. Opens up to 8-10 florets of strong attachment. Excellent propagator of easily germination bulblets. Blue Devil is very striking and attracts immediate attention. Has caused much favorable comment at the shows.

BRIDAL ORCHID (566) (Carlson '50) 85 days.

This magnificent clear lavender won top rating by N.A.G.S. in its color class. Its delicate coloring is emphasized by as many as ten open florets plus six showing color on a spike of 22-24 buds. Every inch a champion. One floret easily measures 6 inches from a large bulb plus the fact that the small bulbs produce fine large blooms. Some of the bulblets will bloom too! This exquisite lavender is a vigorous and easy to grow variety. Along with its championship ribbons, it has been rated among the best new commercial prospects, best bet for major competition, most beautiful, variety florists most like to receive.

RECENT INTRODUCTIONS 1950-1951

COONEY MISS (540) (Krueger '50) (80 days)
For an early mid-season pink,

Cooney Miss, with its trace of darker coloring at the throat, is a very fine glad. It has good substance which makes it fine for cutting. Wonderful grower, Picardy substitute.

DOLLY VARDEN (532) (Harris, 1950)

(95 days) Dolly Varden will open 6-8 of the largest florets I have ever seen in a glad. For such an elephant, it has good color-- a rich salmon pink blending to a cream throat. Said to have been named for the Dolly Varden trout, a handsome species native to British Columbia and Alaska, whose olive coloring is brightly decorated with deep salmon-red spots.

GOLD (412) (Marshall, '51) (75 days)
(Seedling of Orange Gold) This

new self-colored, slightly ruffled yellow is deeper and richer than Spotlight, bears no blotch or marking which makes it the outstanding in this color class. Opens perfectly in water, retains its deep color and size of floret to the very tip. Will make an excellent commercial. Extra strong grower from bulb-lets and a fine bloomer from small bulbs.
